

# Clio® The New Way to Edit Bills in Clio

---

## What are we releasing?

Clio has created a new way to edit and review invoices, with a focus on accuracy, flexibility, and saving time. You now have a more user-friendly Bill Edit view from which you can update bills and find added layers of functionality.

Aggregate, customize, and save bill details with ease, suiting the needs of any practice type or client. Reviewing invoices is clear, the possibility of manual error is dramatically reduced, billing is now a speedy process, and clients receive polished and customized bills.

## What tasks does this update improve?

- **Modifying a bill.** Real time updates to totals and proper validation ensure all changes are correctly made and displayed.
- **Adjusting or applying tax.** This can now be done in bulk, easily and efficiently.
- **Getting insight into Services and Expenses.**
- **Adding Activity Descriptions.** You can now add activity descriptions to a bill, and add UTBMS codes.
- **Correcting or avoiding issues.** An improved, clearer interface reduces the risk of client-facing errors.
- **Reporting.** You now have at a glance access to the status of aggregate line items on a bill without the need to run reports.

## Is this available to all Clio users?

Yes, this updated view will be available to all Clio users with default Billing permissions.

## How do I access this feature?

This feature is available from the “Bill Edit” tab in Clio.

## Where can I learn more about this update?

- Clio [Support site](#)
